

REPORT OF THE SCHOOL SURVEY COMMITTEE

The school survey committee appointed last town meeting, met September to try and find a temporary arrangement for alleviating the crowded conditions at North Clarendon and East Clarendon Schools.

The Grange Hall kitchen was obtained for a school room. This would have nearly eliminated our transportation bill which amounts to \$62 a week. A majority of the school directors ruled against this plan. The schools are still overcrowded and some of the children are transported to the Flats and Hill schools.

Mr. Carl Bachelder and Mr. Winn Taplin of the State Department of Education have visited and know the conditions existing in our schools. Mr. Taplin told our committee that this was the last year the State Board of Education would permit North and East Clarendon schools to run in their present overcrowded condition.

At present East Clarendon Primary room has a capacity of 13. We have 29 children in this room. North Clarendon has a capacity of 23 and at present there are thirty five with 14 more who should go there transported to the East the Hill and the Flats Schools. Three are going to East which makes conditions even worse there.

The Committee with the aid of Superintendent Oulton and the School Board started looking for a solution to these problems. We considered four different ways to solve the problem. They are:

1. Build additions on the present schools at North and East Clarendon. Additional land would have to be purchased, which would be difficult to get at North Clarendon. There is no water at either site, making chemical toilets necessary. Additions, as are the present buildings would be of wood which are not fire proof. State Board of Education has stated it would not approve additions on present building sites. The committee feels that additions would simply be a waste of money and when completed you would still have an old building. All the school buildings in Clarendon are over fifty years old, and are obsolete.
2. Convert the Town Hall into a four room school house. Disadvantages—being, no water, chemical toilets, too near a hard surface road, too near railroad track, insufficient land available, no central heating system, very high ceilings making it difficult to heat. This method is considered by the committee to be impractical as the expense would be great and the results unsatisfactory.
3. Rent another room at North Clarendon. Could be used only temporarily and buildings available very limited; Renting is always expensive. The rent at the East Clarendon Primary School, which is large enough for thirteen has been raised from \$25 to \$35 a month. There is no guarantee that it will stay even at this level. Are the people of Clarendon going to stand for this? Even these two additional rooms would be insufficient to handle the problem in a few years.
4. Bond the town for \$40,000, which we can get without an act of legislature, build a four room fire resistant building in a centrally located spot to take care of North Clarendon and East Clarendon, and possibly all this side of town. Build it so rooms may be added at a later date to take care of the entire town or if the people had rather build a fire resistant two room school on the West side of town.

The bond issue would run for twenty years. The amount every taxpayer would pay every year would be very small for the benefits gained.

The committee figures this method would be the cheapest over a period of years. Repairs and upkeep on these old buildings is costing more every year.

What do you the people of Clarendon believe Education should be? What do you want your school to do?

What are the present policies of your Schools?

Are these understood and accepted by Clarendon?

What changes are needed?

The Committee, in all good faith, have made this survey for you the people of Clarendon. It is up to you, every one of you, to be at town meeting and render your verdict. The situation is serious. Something has to be done. Time will only make matters worse. Any solution is going to cost money, but let us get value received for money spent. Remember Clarendon's children of today will be her citizens of tomorrow.

The Committee wishes to thank Supt. Arthur Oulton, Architects Payson Webber and Ernest Erickson for spending their time and effort in helping us get this report together.

YOUR PUBLIC HEALTH NURSE

Clarendon is one of the 88 Vermont towns provided with public health nursing service by the State Department of Health.

This town appropriated \$375.00 toward the cost of maintaining this service.

Of total funds appropriated for Health Department public health nursing service, local towns contribute 20%, the State of Vermont 41%, Federal grants in aid 39%.

The public health nursing service has as its primary purpose the promotion and maintenance of health and the prevention of illness in the community. In accomplishing this purpose the Health Council and a representative group of all local organizations have been most helpful.

The following statistical report shows the services which I gave your town as your public health nurse during the period July 1, 1949 through December 31, 1949.

TYPE OF SERVICE

To Ill Persons:

- 4 visits giving nursing care to sick persons at home.

To Children Under School Age:

- 1 visit to talk with parents about health needs of their small children.

To School Children:

- 39 visits to schools.
- 87 children received professional examinations.
- 14 visits to homes of school children to follow up health recommendations of examining physician.
- 122 hearing tests were given by means of the puretone audiometer.

Prevention of Communicable Disease:

- 59 children of all ages were given toxiod against diphtheria and/or tetanus.
- 55 children of all ages were vaccinated against smallpox.

Corrective Work:

- 1 child received some dental care financed by the Salvation Army.

Respectfully,

RUBY N. WEST, R.N.,
Public Health Nurse.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Board of School Directors and Citizens of the Town of Clarendon:

I herewith submit my third annual report as your Superintendent of Schools.

Public education never has attained full stature. In theory, we have long been committed to the proposition that every child should have access to the schools. But in practice, many have had no reasonable chance to attend them. In theory, every school is to be a good school—safe, comfortable, well equipped, and taught by a professionally trained teacher. In practice, many schools are of substandard quality by nearly every measure of educational efficiency. To narrow the distance between “the school we have” and “the kind of schools we have said we want”, is an important reason for an expanded and enriched school program.

Tomorrow morning your children and mine will leave for school. What they get in the way of an education; what they have for books, for supplies, for facilities of all types; for a decent school environment, is the business of every parent and every citizen.

TEACHERS UNDER APPOINTMENT

TEACHER	SCHOOL	EDUCATION	BEGAN SERVICE IN CLARENDON
Theresa Dwyer	North	Castleton Teachers College, B. S.	1945
Helen Mitchell	East Grammar	Castleton Teachers College, B. S. Ed.	1949
Lillian Gilmore	Chippenhook	Castleton Teachers College	1947
Ruth Herrick	East Primary	Castleton Teachers College	1944
Maida Johnston	Hill	Univ. of Vt.	1944
Madelene Kelley	Flats	Castleton Teachers College	1945
Ellen Spafford	Springs	Univ. of Vt.	1922

THE CURRICULUM

The curriculum of the elementary school is made up of those experiences of children which the school can develop. Our children are still studying reading, writing, arithmetic, spelling, history, geography, health, science, music and art. But the greater stress today is to relate as closely as possible these subjects with everyday living. Emphasis is placed on learning through “use”, rather than through routine memorization. The curriculum must be flexible enough so that each teacher can effectively meet the individual differences of her pupils.

SIZE OF CLASSES

The modern elementary school aims not only to help children to develop as high a level of achievement in the skill or tool subjects as each child is able to develop, but also to guide their social and emotional development in a wholesome atmosphere. To accomplish these aims, it is recommended that the average class size in the elementary grades be not more than 25 pupils. These class sizes will help to enable teachers to carry on a modern curriculum; to diagnose individual needs and keep individual progress records; to provide for individual differences; to develop a democratic atmosphere in the classroom; and to carry on closer home and school cooperation through parent conferences.

Here are the enrollment and percentages of attendance figures in our schools for the fall term of the present school year.

SCHOOL	FALL TERM		% of ATTEND.
	GIRLS	BOYS	
North	18	17	94.2
East Grammar	13	14	88
Chippenhook	13	12	98
East Primary	15	14	95.37
Hill	14	12	95.3
Flats	10	15	99
Springs	10	6	94.6
Totals	93	90	94.71

School Enrollments over a Ten Year Period (Grades 1-8)

Year	1940	1941	1942	1943	1944	1945	1946	1947	1948	1949
Enrollments	130	128	127	119	108	148	140	149	156	183

Resident Births in Clarendon 1940-49

Year	1940	1941	1942	1943	1944	1945	1946	1947	1948	1949
Births	8	16	14	18	11	17	26	18	18	23 (est.)

The above figures show that the high point in our first grade enrollments will be reached about 1952. Increasing enrollments bring up the problem of housing, but not that problem alone. An increase in the number of pupils causes a resulting need of more teachers, additional books, more supplies, etc., all resulting in a higher cost.

YOUR SCHOOLS

The people of Clarendon face several important decisions regarding the education of their children and youth during the next few years. These are problems which have been developing for several years and are now reaching an acutely critical stage.

In order to reach some satisfactory solutions to these problems, the School Directors of Clarendon and your Survey Committee, headed very capably by Mr. Leland Congdon, has carried out a comprehensive study of what it believes are the most crucial educational problems facing the people of Clarendon. There are closely related problems which need immediate consideration. The first problem is that of adequate school housing. Each one of our schools is

fifty years old or older. All schools are obsolete from a modern health, safety and educational point of view. Alterations of present structures, new additions, a new building, or perhaps a combination of all three, will be absolutely necessary in the near future. This raises the question of how many classrooms are needed, where they should be located, and the size of these schools.

A community has an opportunity only about once in fifty years to build new schools, or to carry out a modernizing program. The future of Clarendon in terms of its attractiveness as a good place to live, to raise and educate children, is dependent to a large extent on finding satisfactory solutions to these problems. I cannot urge too strongly the need for every citizen to study the recommendations of your committee in order that a definite plan of action may be taken by the voters at this coming town meeting. **YOUR DECISIONS WILL DETERMINE THE EDUCATION THAT CHILDREN WILL RECEIVE FOR THE NEXT GENERATION.**

THE BUDGET

Our estimated budget shows an increase in comparison with a year ago. This rise in school costs is due to:

1. High school tuition rates have been increased to \$150. The rate last year was \$100.
2. We will have approximately ten more pupils attending high schools next year than are enrolled at the present time.
3. An additional teacher to alleviate the over-crowded conditions at the North Clarendon and the East Clarendon schools, which would also eliminate the need for transporting children to the different schools in town as we are doing this year.

Here is a comparison of our current school expenses over a five year period:

SCHOOL YEAR	SCHOOL COSTS
1944-45	\$10,602.86
1945-46	12,828.90
1946-47	15,628.97
1947-48	20,767.60
1948-49	22,013.18

Here is a comparison of our per pupil costs over a five year period.*

1944-45	\$ 87.84
1945-46	82.22
1946-47	98.87
1947-48	122.16
1948-49	126.23

*Our new State law requires the expenditures on the part of each community of the sum of at least \$130 per pupil in average daily attendance in order for that community to receive State Aid.

Here is a comparison of our State Aid reimbursement over a five year period:

1944-45	\$ 3,311.49
1945-46	4,444.74
1946-47	5,208.15
1947-48	8,423.14
1948-49	8,623.15

HOT LUNCHES

I have already mentioned in a previous report that there is a definite trend to establish school lunches, supported partly by the Federal Government, in all schools. The many studies that have been made of the correlation between school achievement and nutrition, invariably have shown a high positive relationship. This improvement takes the form of fewer absences from school and a general increase in the quality of work performed because of greater alertness. Similarly, improvement of nutrition reduces pupil fatigue and increases resistance to infection. Moreover, the greater distances which many pupils now live from the schools they attend, heavy traffic, increase in the number of mothers who are gainfully employed, and a generally heightened interest in nutrition on the part of the public are leading to more acceptance of the idea of school lunches for all.

It is my feeling that Parents' organizations should give serious thought to have included those few schools that are not at the present time enrolled in a school lunch program, in order that every child might be allowed the opportunity to participate.

DID YOU KNOW

1. That local births reached the high mark in 1946 at a figure of 26 and that these children will enter our schools in 1952?
2. That our total elementary school enrollment is 183 this year?
3. That we have 18 eighth graders this year?
4. That of our young people attending high school
 - 3 are at West Rutland
 - 6 are at Mount St. Joseph
 - 6 are at Wallingford
 - 28 are at Rutland
 - 1 is at Atlantic Union
5. That the average teacher's salary in Clarendon is \$1,842.86?
6. That it cost \$126.23 to educate each child who attended elementary and high school last year?
7. That Clarendon will receive \$11,275.03 in State Aid this year?
8. That the State requires the expenditure of at least \$140 per pupil in average daily attendance in order to receive State Aid? (Exceptions were made to certain communities for this year only).
9. That East Clarendon Primary School has 29 children enrolled with a floor area adequate for about 13 children?
10. That there are about 50 children in the vicinity of the North Clarendon School who are in grades 1 through 8?
11. That new toilets were installed at North Clarendon and the Flats School last summer?
12. That two of the seven schools now in use have running water?
13. That all of our schools are visited regularly by a Public Health Nurse?
14. That 4 of our schools are carrying on some type of a hot lunch program?
15. That our schools cannot operate on a \$2 school tax and pay their current expenses?

CONCLUSION

In presenting to you this report of the third year it has been my privilege to serve as Superintendent, I wish to express my appreciation to all of you who have participated in the operation of our schools, for your cooperation both financially and morally. The accomplishments of the year are both tangible and intangible. Through the combined strength of the staff, working with lay individuals and community agencies directly or indirectly concerned with the education of young people and adults, we will strive to provide better educational opportunities for the children of Clarendon.

Respectfully submitted,

ARTHUR C. OULTON,
Superintendent of Schools.

AUDITORS' REPORT

We appreciate very much the cooperation of all of the officers in the preparation of this report. We also wish to thank the Chairman of the Selectmen for his suggestion in eliminating outstanding town orders.

WILLARD SQUIER,
EDNA LEAHEY,
CARROLL WEEKS,
Auditors.
